Five free boulder puzzles

A first look at LÍNA Book 2

Book 2 keeps everything from Book 1 and adds a new kind of node: the boulder. These five puzzles use circles and boulders, from easy to hard. Print them, grab a pencil, and enjoy.

The rules

Connect matching letters.
Draw each line from its letter on the left to the same letter on the right.

One step at a time.
Each stroke moves one column right: up, flat or down.

No sharp reversals.
Up cannot be followed straight away by down, or the reverse.

Lines never cross.
Lines never touch or cross, and stay below the ground.

Use the counts.
The number above each column is how many strokes go up there; the number below, how many go down.

Visit every circle.
Every circle is on a line.

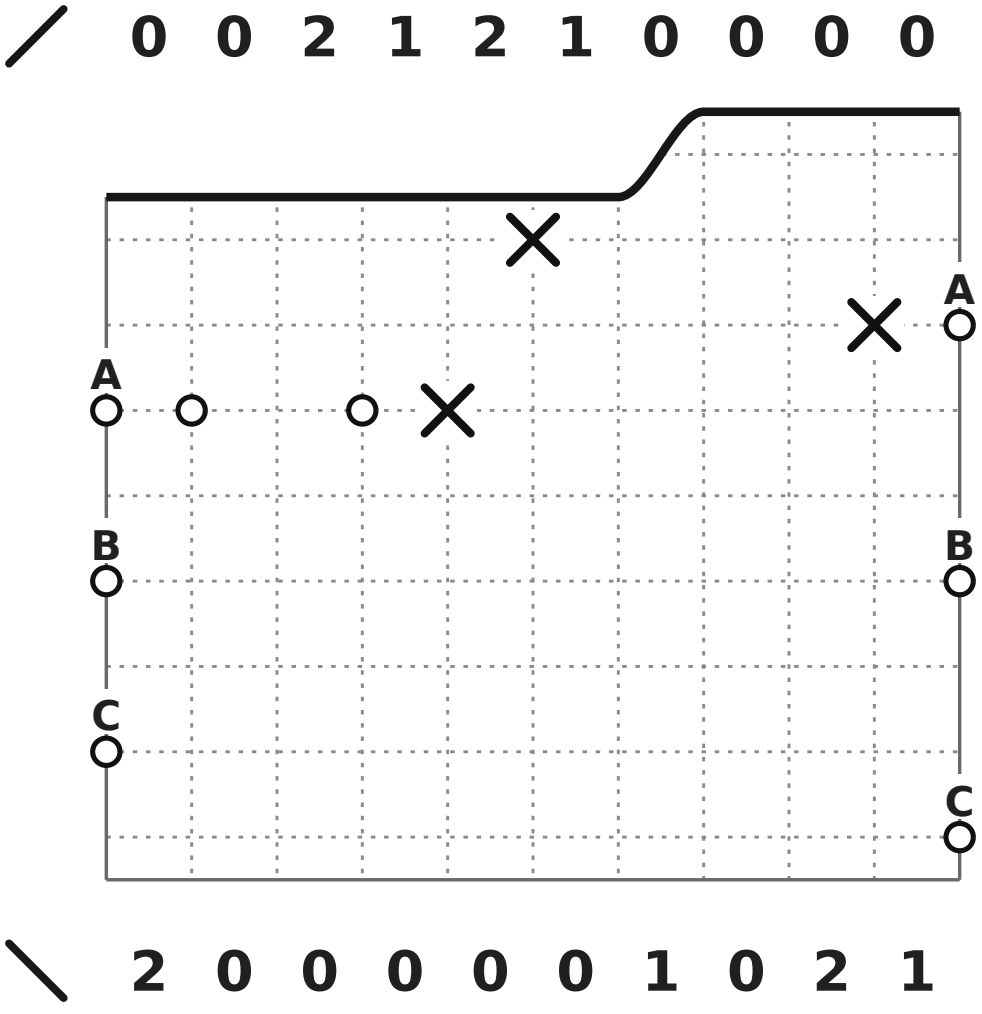

× **Go around every boulder.**
A boulder is a solid rock where no line can pass through.

Every puzzle has exactly one solution, and each can be solved by logic alone. No guessing needed. Answers are on the last page.

1

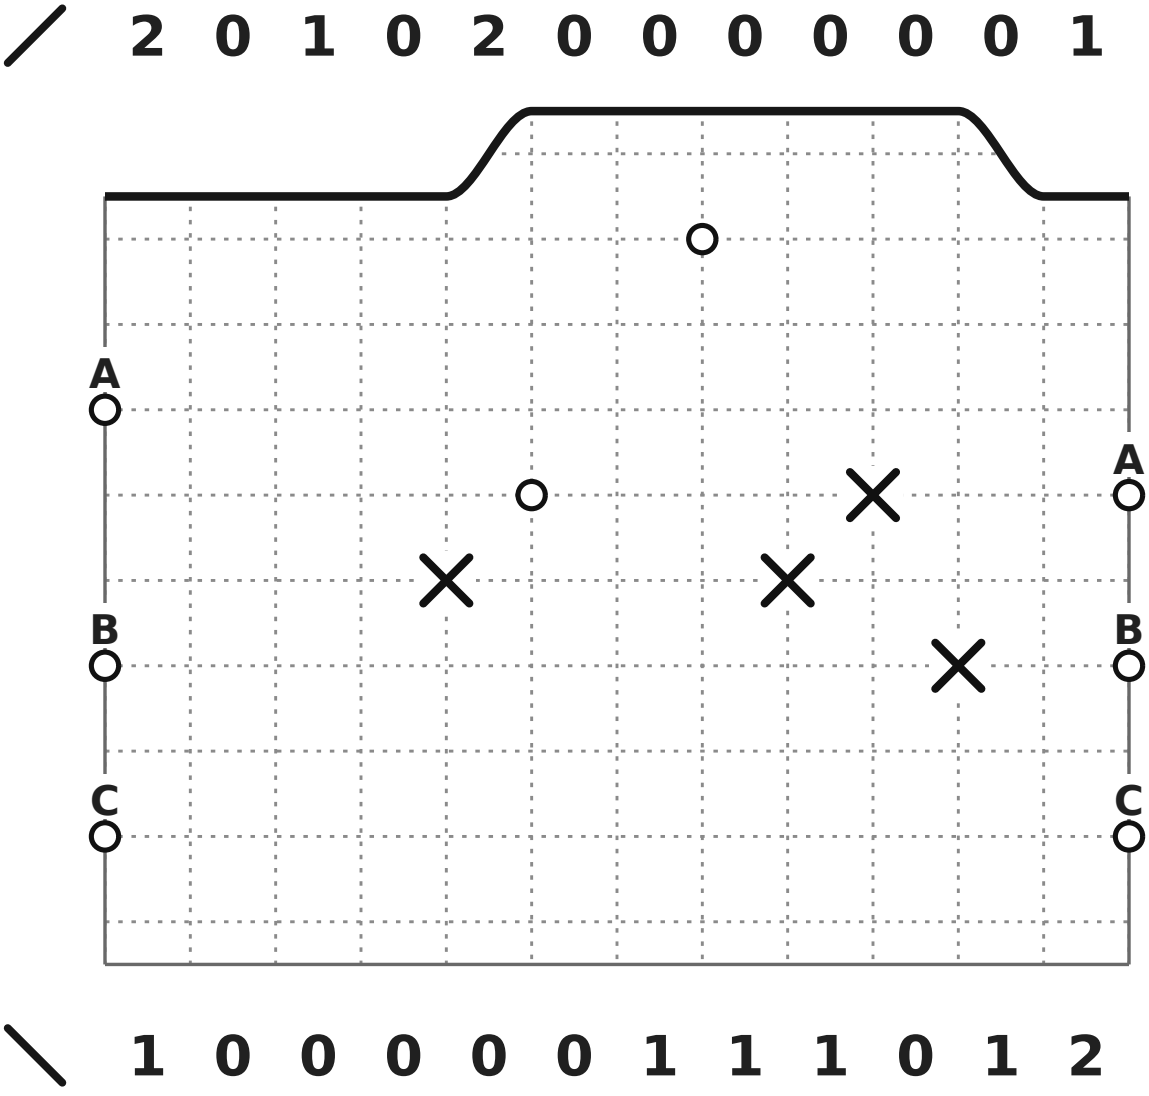

Easy

Connect matching letters · No sharp reversals · Lines never cross
Visit every circle · No line through a boulder

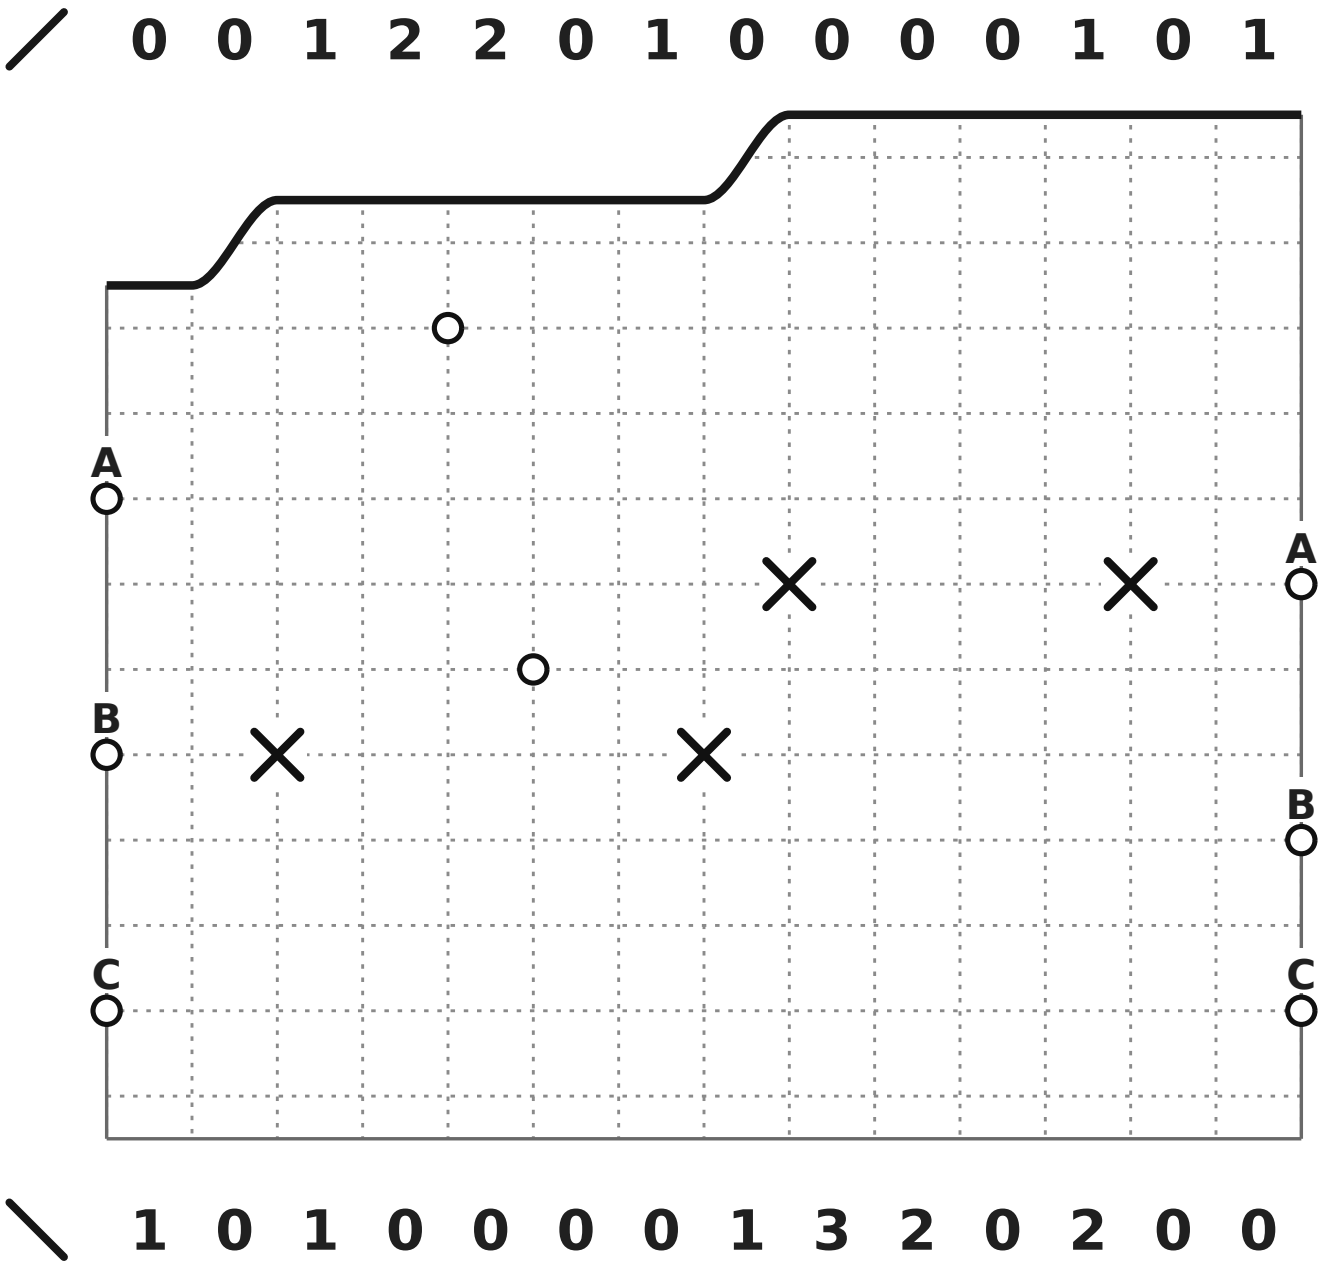

2 Medium

Connect matching letters · No sharp reversals · Lines never cross
Visit every circle · No line through a boulder

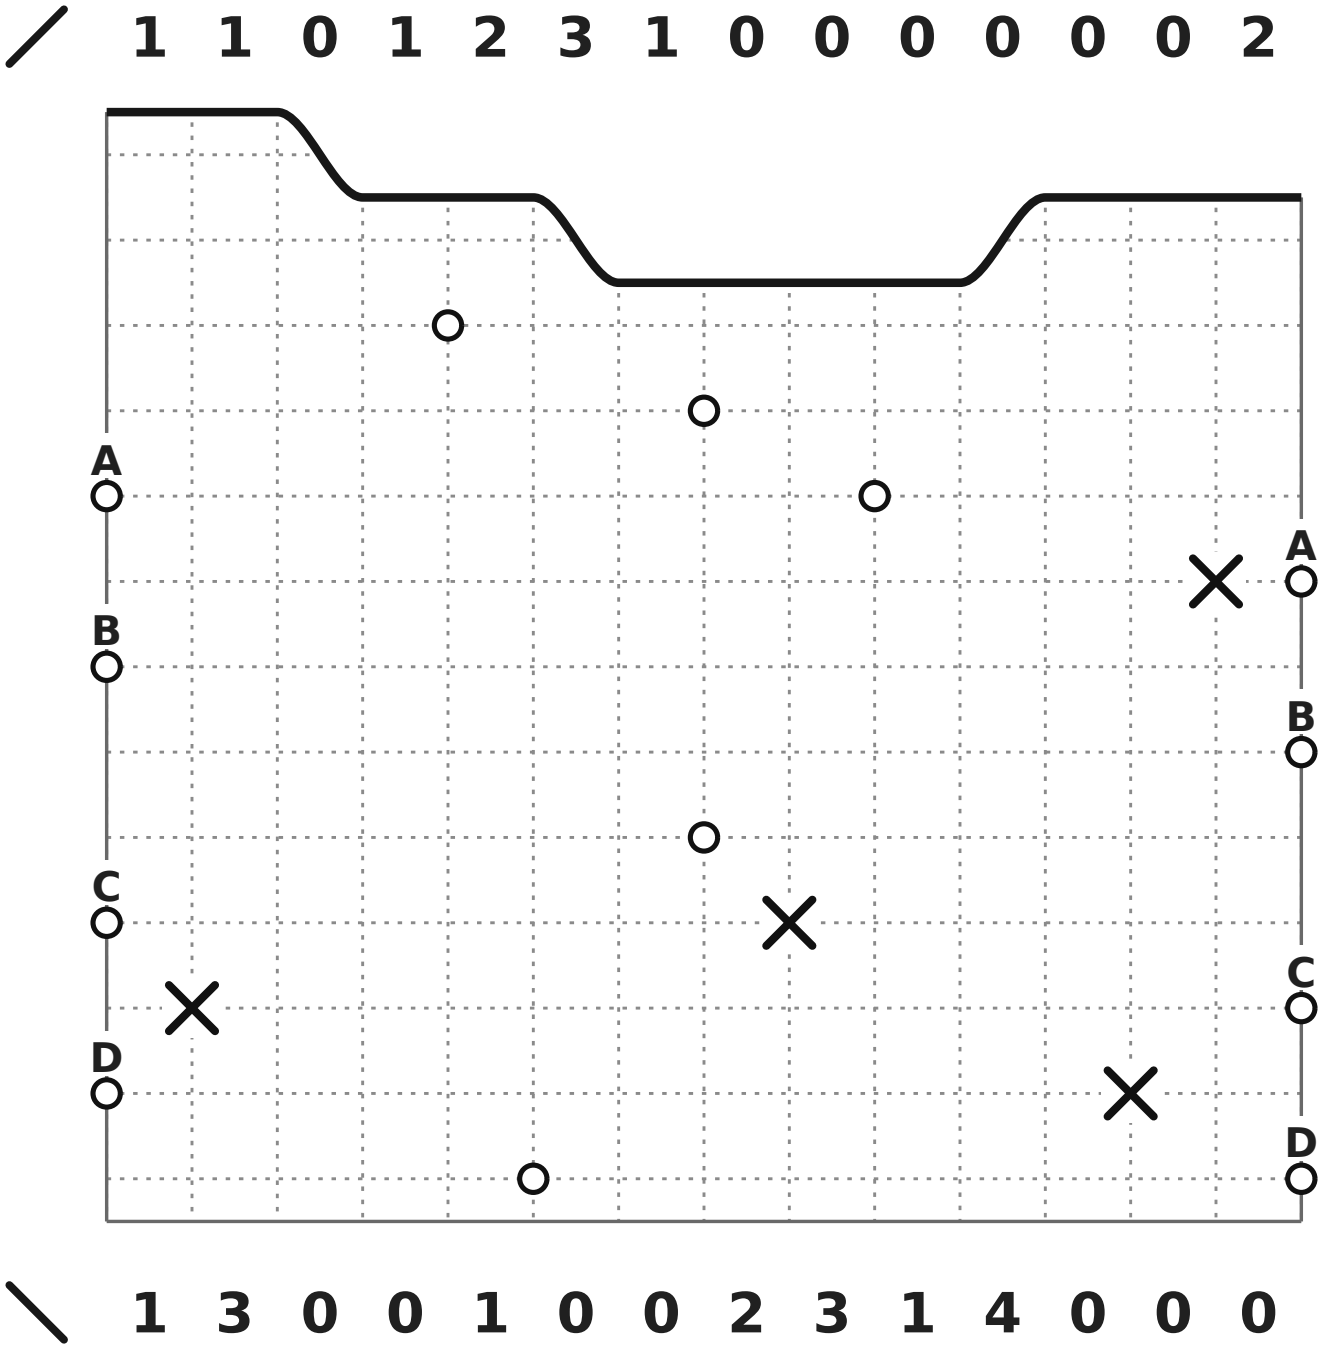

3 Medium

Connect matching letters · No sharp reversals · Lines never cross
Visit every circle · No line through a boulder

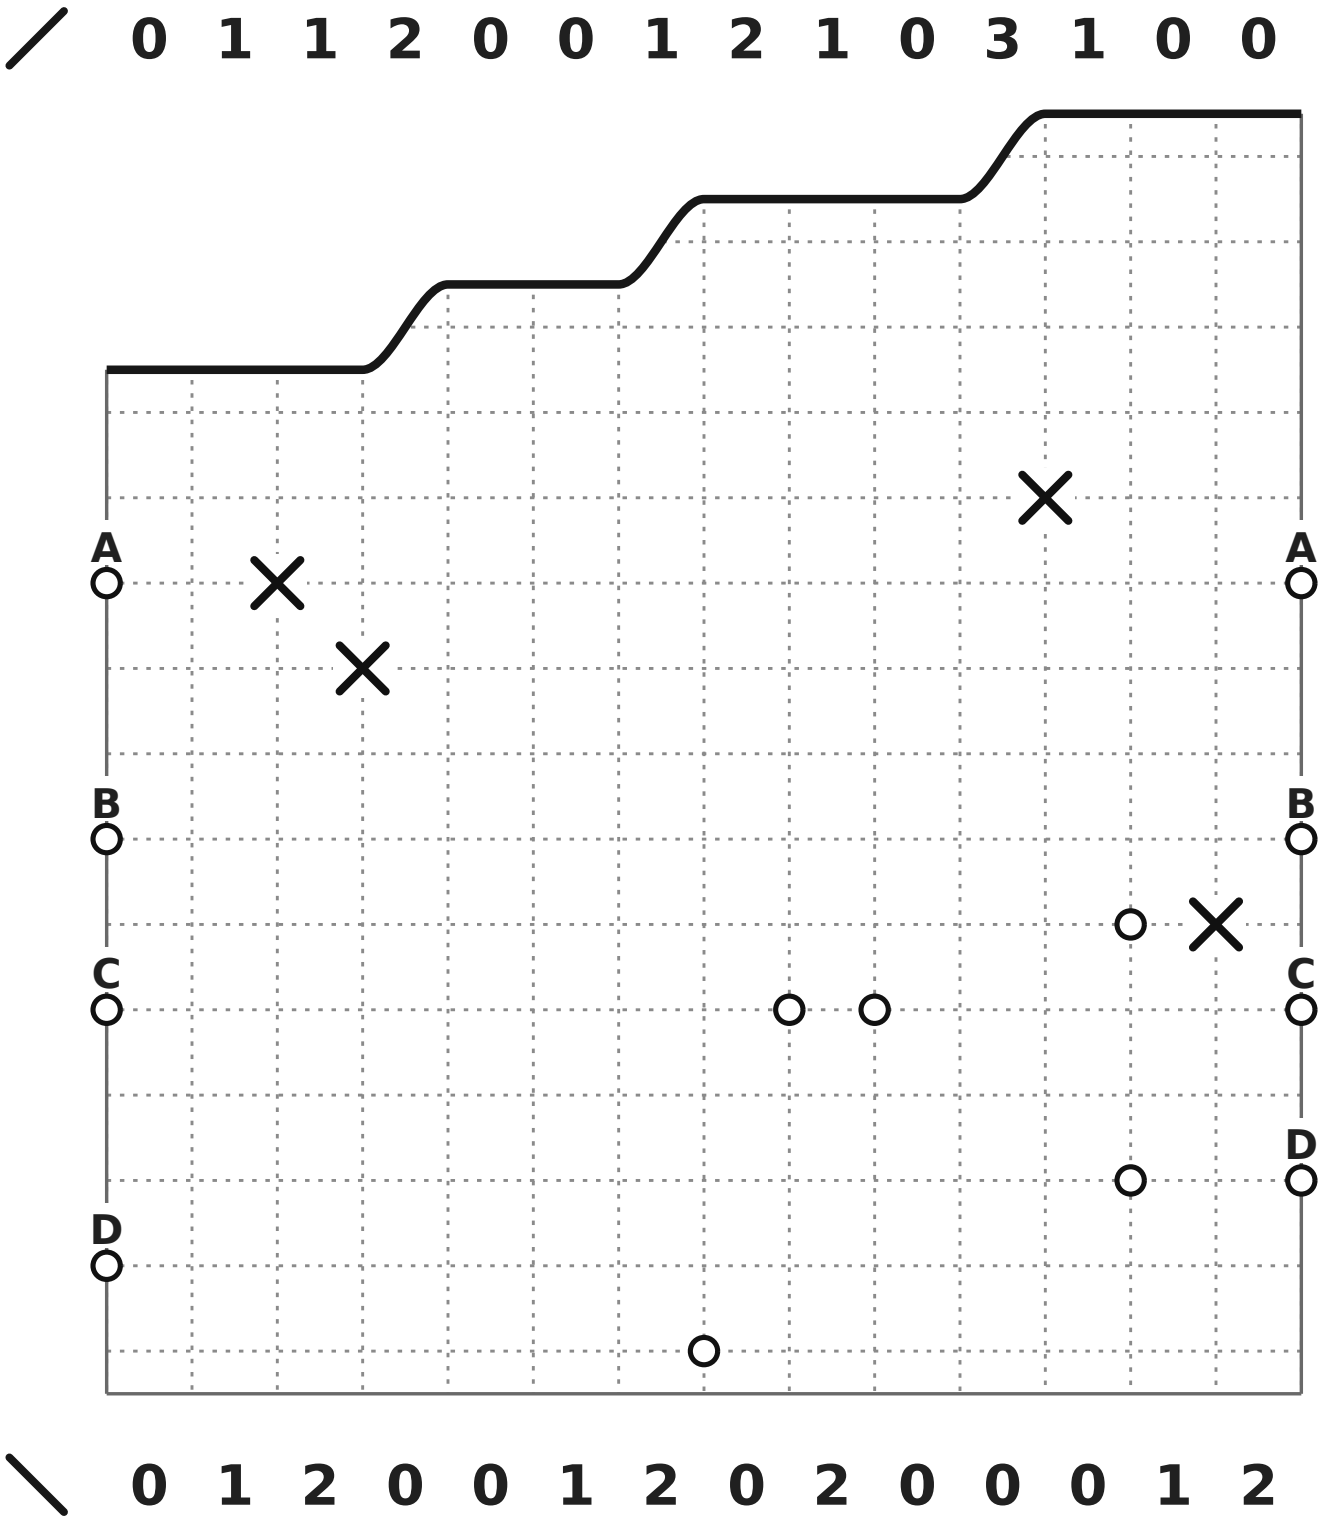

4 Hard

Connect matching letters · No sharp reversals · Lines never cross
Visit every circle · No line through a boulder

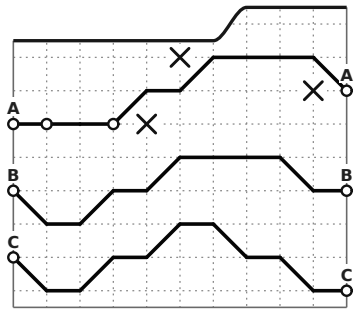

5 Hard

Connect matching letters · No sharp reversals · Lines never cross
Visit every circle · No line through a boulder
